

Save the Date – February 15, 2017

*The Genomics and Health Disparities
Research Interest Group presents*

Precision Medicine in Action: Using Genomic Tools to Improve Health Outcomes

Hannah A. Valantine M.D.

NIH Chief Officer
of Scientific Workforce Diversity

Senior Investigator
Laboratory of Transplantation Genomics
NHLBI

Location: NIH Main Campus, Porter Neuroscience
Research Center (Building 35), Room 610

Seminar: 4:00 – 5:00 p.m.

Networking: 5:00 – 6:00 p.m.

Mission Statement

The Genomics and Health Disparities Research Interest Group connects individuals from different disciplines across the research community to engage in scholarly topics that involve both genomics and health disparities and provide opportunities for professional development, social networking, and community engagement.

Please join us to discuss your insights into health disparities in genetics research and ways in which we can ensure that all populations benefit from the advances of genomics research.

Light refreshments and snacks will be served

Interest Group Organizing Committee: Mr. Vence Bonham, Ms. Corinne April Conn, Ms. Pearl Eni, Mr. Michael Hahn, Dr. Paule Joseph, Dr. Deyana Lewis, Dr. Candace Middlebrooks, Ms. Anitra Persaud and Dr. Teresa Ramirez
