

HPH PHARMACEUTICAL WORKING GROUP JOINT PRODUCT COLLABORATION

FBI's Office of Partner Engagement (OPE) along with the Office of Private Sector (OPS) would like to invite federal, state, local, tribal, territorial, and private sector (FSLTTP) healthcare pharmaceutical analysts, informaticists, and security personnel to participate in recommending, drafting, and disseminating a Healthcare and Public Health (HPH) Pharmaceutical Joint Product.

Our goal is to disseminate a written product for and about our sector's risks, critical threats, and vulnerabilities associated with opioids, corporate espionage, product tampering, counterfeit drugs, etc.

This HPH Pharmaceutical Working Group written product will allow FSLTTP analysts and security professionals the opportunity to work jointly to use analytical tradecraft standards to develop a joint product that meets professional intelligence tradecraft standards, and gain a practical understanding of how the FBI processes and analyzes information that enhances Intelligence and Operation integration.

*Interested participants should contact OPE-EEU@fbi.gov (OPE) and Joseph P. Doran jpdoran@fbi.gov (OPS) by **May 31, 2019**. Please specify your interest in a joint product, any recommended topics, related subject matter expertise, and how this product may benefit your area of responsibility.*
